Saturday Islanders Getting Thank You for Aiding Mariners

Insect Agents and Shortage Cut Cancer Research

Dr. David R. Grassetti said today he had found a family of chemicals that stop the spread of tumor cells in mice to other parts of the body to other

At present cancer cells have a strong tendency to spread from an original tumor site through the blood stream to other parts of the body, especially during surgery. The compound, carboxypyridine disulfide, prevents such a spread in mice, but Grassetti does not know why.
