New York, NY 10029

Dear Dr. Langer:

As a follow-up to the telephone conversation on March 18, 1976 between you and Mr. Heinz J. Eiermann, we are transmitting to you the following subsamples of commercial cosmetic talc products:

DCST - 76-1358
DCST - 76-1359
DCST - 76-1360
DCST - 76-1362
DCST - 76-1363
DCST - 76-1364

We would appreciate an analysis of these products for asbestiform minerals by x-ray diffraction and any other applicable technique(s) are, in your opinion, appropriate for the analysis of fibrous asbestos minerals.

We would also appreciate receiving portions of those talc products which were implicated in your recent talc studies. These samples will be used for the purpose of analytical research and for the comparison of methodologies. You will be informed of the results of our examination of these samples.

Thank you for your cooperation.

Sincerely yours,

Ronald L. Yates
