Santicizer 794

Mr. Don Harris

Messrs. V. Brawley
D. T. Mayer
M. D. Dealy
M. J. Smid
E. Campbell
W. J. Gresham
R. J. Kuster
E. E. Martin
L. M. Phipps

As soon as we receive a Tentative Process which is expected within a few days, we will start production of a new product Santicizer 794.

Since Santicizers are a large family of products, we can expect additions to the product family in the future. We will immediately need a new department number assigned such as Dept. D-246 and a cost standard sheet. Leo Phipps can help you on this matter. The attached sheet notes the product code 7704-794-04-03 has been assigned.

By this memo we are requesting M. D. Dealy to establish a Tentative Specification Sheet as per the R. H. Mills 12/23/64 memo also attached. Please evaluate the proposed specification and advise if the ranges do not appear practical.

Don Mayer has already received an order for 4 six hundred net drums (copy attached). By this memo we are requesting that Milt Smid check with Walter Hunt at JFQ to see if there are any special drum or stenciling requirements and establish a standard for us. JFQ presently packages Santicizers.

As soon as we get the process, we should proceed to make and drum the 2000 gallon batch. Please advise Don Mayer when the drums are ready to ship.

Kindly advise if there are any questions on this matter.
