Dear Mr. Merriman:

The recent health survey of workers at the styrene plant at ARCO depended upon the meshing of complex requirements, all essential for the working of the whole.

Your assistance, then, in seeing to it that many of these pieces fit together -- seeing to it that mattresses, blankets, scale, etc. -- were delivered and returned assured this necessary interdigitation.

Your help, then, was most important for the success of our research and we are grateful to you. With our best wishes for the New Year.

Sincerely yours,

Irving J. Selikoff, M.D.
Professor
