B. Interlock By-Pass Procedure

SHAC will survey the plant to determine how well we are complying with the current procedure. Also, copies of procedures for by-passing critical interlocks will be obtained from Chocolate Bayou and the Pensacola plant (maleic anhydride). This information will be given to SAC for review and recommendation.

III. ACTION ITEMS

A. Days Away from Work Injury Goal

Signs will be placed at the three main gates next week that show our status concerning beating the previous record of 8.7 million safe workhours.

B. Job Safety Audits

Three members from SHAC and Mark Riddle will visit Chocolate Bayou 3/21/85 to review their job safety audit program. A JSA program will be instituted in the plant this year.

C. AVIP

SHAC will be working with people requesting extensions on vessel inspection to assure appropriate data and reasoning are present prior to approval. When extensions are approved, the new approved date will be the due date for that vessel inspection. The exception report will only include those vessels that are out of compliance or have not yet received approval for deferral.

D. HHM Audits

Recommendations from the High Hazardous Materials audits will be sent to the appropriate superintendent for comment and review. These comments must be returned to Harry Conrad by April 4. A final rough draft of the HHM report will then be reviewed at a separate meeting.
