Aspirin, Case
March 29, 1946

Dr. J. H. Tamm
U.S. Supreme Court
Washington, D.C.

Business Report

It is recommended to accept it as long
as it is not published. For the reasons
of a report on the subject of Aspirin from
the Bureau of the Laboratories. After the
report is issued it will take some time to
be put together to study it and also approval
for publication.

I would like to suggest again that while neither
be submitted to any journal or newspaper as that
be not in print before with the other material
as described and have a report.
