

July 3, 1956

Mr. J. A. Costello, Vice President
Ethyl Corporation
100 Park Avenue Building
New York 17, N. Y.

Dear Mr. Costello:

I am sorry that traveling has not permitted my responding to your letter of June 25 before now.

We are indeed interested in the vinyl chloride monomer which Ethyl Corporation is offering up beyond the need and obligations of Ethyl Corp on March 21, 1956. As you can well expect, before we can give a firm answer in regard to this, we need some further information as to the time at which this monomer will be available and the contract conditions which you suggest.

I expect to be in New York the latter part of next week. I hope that it might be convenient with you for me to visit you and discuss this further on the morning of July 13.

I look forward to seeing you.

Sincerely yours,

Assistant General Manager
