subject: property value protection

Per our phone conversations, here is background info. both on the property value protection firm (PHH Home Equity) as well as on the DuPont site (Pompton Lakes) they assisted. (This company also does Monsanto's company-wide employee relocation program, and has done some work for Soda Springs plant. They recently made a presentation at Port Plastics plant concerning the Bond Road landfill.)

Regarding the DuPont situation, there appear to be quite a few parallels with our Anniston plant. But note the date of the news coverage: 1991. Would be interesting to know how DuPont's situation has played out over last few years. Call the plant manager?

All of these materials are for you and Anniston team. I have a duplicate set. Act on this as you see fit.
