Dear Mr. Horinek:

② Diffuser sending 2 1/2 gal bottles as
favor to me.

I have searched our files and have been unable to locate the name and address for the manufacturer of the Glasoclear vinyl bottles. I have forwarded your inquiry directly to four members of our association - the BFGoodrich Company, Georgia Gulf Corporation, Occidental Chemical Corporation and Shintech Inc.

In addition, they will be able to answer your questions regarding resin shipments and pricing.

You should be hearing from representatives of one or more of the above companies in the near future. If we can be of further assistance, please let us know.

Sincerely yours,

Meredith N. Scheck
Assistant Director

GLASOCLEAR VINYL PLASTIC BOTTLES

I noticed your company's name in the magazine, "Modern Plastics" and would appreciate receiving further information.

We are in the water distillation industry and are very interested in the "Glasoclear Vinyl Plastic Bottles". Who manufactures them in the United States, and is there a Canadian manufacturer?

If the 128 oz. bottles are not made in Canada, we may be interested in manufacturing them ourselves for the Western Canada market. I would appreciate information on blow-molding equipment (new and used) as well as the vinyl. How would the vinyl be shipped in bulk (drum, train car, etc.), and all pertinent pricing.

I'm looking forward to your reply.

*Norm - Not at 128 oz. Show - also int 2 liter size
you should advise Setco or your best Canadian Show No 10
prospect, TP*

Dick
