2d ed. 1948

Industrial Medicine Publishing Company
Chicago, Illinois

INDUSTRIAL MEDICINE is important work; and it is being done by important men. *But who are these men?* This second edition of *Who's Who in Industrial Medicine* is another step toward the identification of the field and its corollaries. Here are the *notable and important* physicians and surgeons, hygienists and dentists, who are engaged full time, part time, or as consultants, in all the various kinds of medical, surgical and hygiene work which industrial medicine requires of the professions. The publishers intend to issue subsequent editions biennially, bringing the previous editions successively up to date and adding new names. Meanwhile these are the leaders, the pioneers, the outstanding practitioners. They are, indeed, "a goodly company."
