Comment: Rausch, Gene A CIV CNIC HQ, N3:

Rules of Engagement:

1. Inventory ONLY firefighting foams agents in the F&ES department's possession.
2. DO NOT count foams or in installed facility fire protection systems.
3. Use pull down menu(s) before typing. If the choice is not available enter the complete nomenclature as written on the product container and click "Yes" on the pop-up warning message.
4. Aircraft Fire Fighting Foam (AFFF) in ARFF trucks and ARFF trailers - use your best judgment as to the brand of AFFF in use.
5. ESTIMATE the amount of AFFF in the vehicle or trailer as the full amount unless you knowing know the amount...it is NOT necessary to drain tanks in order to determine the amount.

BLUF - IMPORTANT: Determine the total amount (gallons) of each "type of foam" for each "storage location."

CNIC will total each Region for the total amount (gallons) of each "type of foam."

Comment: Rausch, Gene A CIV CNIC HQ, N3:

1. Only inventory clean agents in the F&ES department's possession.
2. DO NOT count clean agents in installed facility fire protection systems.
3. Use pull down menu(s) before typing. If the choice is not available enter the complete nomenclature as written on the product container and click "Yes" on the pop-up warning message.
4. ESTIMATE the amount of clean agent in the vehicle tank or bulk container, enter the full amount unless you know the amount...it is NOT necessary to drain tanks in order to determine the amount.
5. BLUF - IMPORTANT: We need the amount (pounds) of each "type of clean agent for each "storage location."
6. CNIC will total each Region for the total amount (pounds) of each "type of clean agent."
