

CORNING GLASS WORKS

CORNING, NEW YORK

W. C. TEMPLER, M. D.
MEDICAL DIRECTOR

October 21, 1938.

Dr. Leroy U. Gardner,
Director of Saranac Laboratory,
Saranac Lake, New York.

Dear Doctor Gardner:

Within a very short time there will be a new corporation formed, owned chiefly by the Corning Glass Works and the Owen-Illinois Glass Company, to manufacture Fibre Glass.

You, of course, will recall the work which you did on this some few years ago and the conclusion that it was harmless to a great extent as a fibrous-forming material. I would like to discuss this point further with you and wonder if it will be convenient for you to spend perhaps a half hour with me at Albany on November 3. I mention this date because of the fact that you are on the program of the meeting held there that day.

If this would not be convenient, I will gladly come over anytime at your convenience.

Very truly yours,
CORNING GLASS WORKS.

W. C. Templer, M. D.
