Subject: Vinyl Chloride Research Program
Continuation of Multi-Component Studies
at the University of Louisville

Dear Mr. (A)Clark:

This is to advise you that Industrial Chemicals Division of Allied Chemical Corporation is no longer involved in the EDC/VCM area and that Mr. Joel B. Charm, Director of Product Safety in Allied's Corporate Office will be the Allied participant on MCA's EDC and VCM Technical Panels.

We are forwarding your letter of December 13 and Ms. Henschel's letter of December 20 to Mr. Charm and ask that you send all future correspondence and reports to him.

Sincerely,

A handwritten signature in dark ink, appearing to read 'J. D. Dougherty'.

J. D. Dougherty, M.D.
Director-Medical Services

Subject: Vinyl Chloride Research Program - Continuation
of Multi-Component Studies at the University of
Louisville

Dear Dr. Dougherty:

The Technical Panel on Vinyl Chloride Research recommends continuation of the multi-component research program being conducted by Dr. C. Tamburro at the School of Medicine, University of Louisville. This research has as its objectives the design of methods for early detection, prevention, diagnosis and treatment of those individuals exposed to potentially toxic chemicals with the aim of preventing any serious injury, pre-cancerous lesions, or the development of cancer either on a short or long-term basis. The program is designed to identify, at the earliest possible time, potentially harmful chemicals and to lead to a reduction in their exposure based on objective chemical data. This is the third year of a three-year research program and it is the view of Panel members that if this overall program is to yield optimum results it is important that continuity be preserved.

The technical proposal and budget involve three parts:

A. Research Techniques and Methods for Detection and Prevention of Carcino- genesis in Industrial Workers	\$260,734
B. Whole Body Autoradiographic Study of Vinyl Chloride	\$ 13,500
C. Vinyl Chloride Metabolism in Isolated Mammalian Liver Cells	<u>\$ 13,550</u>
TOTAL	\$287,784

ASI 000011534

Administration costs will be covered by funds remaining from the second year of research.

The technical proposal, sent to your company's Technical Representative on October 4, 1978, contains additional information on the type of research being conducted and a breakdown of costs.

The attached response form lists your company's maximum pro rata share. Should the number of companies participating be greater than anticipated, your company's share will be reduced proportionately.

Work under the second year of research will be completed in February 1979. In an effort toward eliminating the costly interruption of this research, we request that you return the attached commitment form by December 22.

Sincerely,

A. C. Clark
