

1 library. Some of them are smaller circulation than
2 in others, of course.

3 Q Doctor, did you prepare a list of the articles that
4 you researched with respect to asbestos-related
5 disease?

6 A Yes, sir, I did.

7 Q Let me show you this 43 page document. It doesn't
8 have a title.

9 But let me ask you if you could tell the
10 jury what that particular document is?

11 A Yes. This is a list I prepared, probably some six or
12 seven years ago, and it lists the medical articles
13 that I'm talking about. It's listed chronologically
14 by date, with the date along long the left-hand
15 margin, and then within each year the articles are
16 listed alphabetically by author, and it's 43 pages
17 long, single spaced, with one space skipped between
18 each entry.

19 Q These are all articles that were pre-1965?

20 A 1965 and before, yes.

21 Q Now, Doctor, based upon your review of the medical
22 and scientific literature as you have described, do
23 you have an opinion on when it was first known that
24 asbestos could harm people?

25 A Yes.
