Rt. 3, Baxter Lane
Winchester, Tennessee 37398
Attention: Jim Hoey

Jim,

Enclosed are two envelopes marked #1 and #2. The slab in the envelope is the 1/2 of the gasket that we milled and molded. Maybe you can check adhesion of the slab and 1/2 gasket under the same conditions to verify difference, if any.

Please copy names listed below.

Respectfully,

A handwritten signature in cursive script that reads "Richard Znidarsic".

SUBJECT: PVC/Nitrile Quarter Window Gasket

cc: A. Johnson
A. Otomi
T. Steele

Mr. Znidarsic:

Enclosed are two (2) PVC/Nitrile Quarter Window Gaskets. Because of discrepancies between adhesion testing of sample slabs and the manner in which the gasket adheres to the actual glass assemblies - using the same adhesion system - Alan would like these gaskets to be made into slabs for comparison testing. If the lab at Chardon could make at least 2 slabs and return them to CKR ASAP, we will run comparison adhesion tests. If you have any questions or comments, please contact me.

Thanking you in advance,

Jim Hoey

Mr. Dick Znidarciak
Technical Director
Chardon Rubber Company
373 Washington Street
Chardon, Ohio 44024

Dear Mr. Znidarciak:

Don Tredinnick has notified us that you have agreed to modify your specifications for Mooney viscosity as follows:

	<u>Old Specification</u>	<u>New Specification</u>
Royalene - 525	60 - 65	62 - 68
Royalene - 2914	43 - 48	45 - 51
Royalene - 509	50 - 55	52 - 58

We are notifying our plant to make these changes and we will comply with the new limits on future shipments.

Thank you for your help in centering these specifications.

Very truly yours,

UNIROYAL CHEMICAL CO., INC.
