

Interoffice Communication

To Ginny Belk, R.N., Aberdeen
From J. R. Drumwright, M.D.
Date March 24, 1983
Subject RE: OSHA LEAD STANDARD

I am forwarding for your review a copy of the memo received from the Occupational Safety and Health Committee of DuPont, relative to the OSHA Lead Standard.

As you can see, this is a reminder as to the March 1, 1983, date regarding the lead standard.

As you are aware from our telephone conversation of 3-23-83, we are now receiving, in the Medical Division, copies of the Part I HEI examination for Aberdeen employees. At the time of this dictation, only one or two days worth of reports have come in. I will be reviewing the results closely in view of the blood leads on several employees which will be included in these.

In addition to the blood lead review, I will also be paying close attention to the liver function test elevations which we have recently seen to be very borderline and, at the time of the hands on examination in early May, 1983, discussion with those employees which have indicated that they wish further consultation will be arranged.

Please let me know if I can be of additional assistance.

A handwritten signature in dark ink, appearing to read "J. R. Drumwright".
