To: All Participants - Working Group on Insulation Industry Hygiene

The Insulation Industry Research Council, formed by the Working Group on Insulation Industry Hygiene on May 14, 1968 at The Academy, will meet on June 11, 1968. It is understood that the function of this Council is to rapidly develop an appropriate industrial hygiene program for the insulation industry. The individuals selected for service on the Council are listed on the attached page.

At this point, the Council will be primarily concerned with:

1. Definition of its responsibilities. It is anticipated that the Council's recommendations concerning industrial hygiene measures will be decided upon unanimously by all members of the Council and similar approval will be required for publications and educational material developed by the Council.

2. Identification of competent, experienced engineering staff for the research program. Such individuals will probably be found in industry but once part of the research program, their responsibility will be to that program.

3. Rapid implementation of the research program and development of appropriate recommendations based upon its findings.

Your thoughts and advice on these and other matters will be welcomed by the Council's members. At present, communications should be addressed to the Council, c/o The New York Academy of Sciences, 2 East 63 Street, New York, N. Y. 10021.
