

1 it would be a way to prevent people from getting
2 asbestosis?

3 A And other things, too. Now your dentist
4 wears one.

5 Q Specifically people who used asbestos-
6 containing products, pipecoverers, asbestos workers in
7 the 1940s and 1950s, you knew that if those people
8 wore a respirator, it would help to prevent the
9 disease of asbestosis?

10 You knew that, didn't you?

11 A Yes.

12 Q And do you agree that if a worker was
13 working with asbestos-containing products in the 1940s
14 and 1950s as a pipecoverer, that part of the necessary
15 education of that worker would include advising him
16 that he should wear a respirator to prevent the
17 disease of asbestosis?

18 A Yes. Now, let me ask the question, do they
19 today?

20 BY MR. MCGOWAN:

21 Q Do they today?
