Dear [REDACTED],
Thank you. Our team will be delighted to meet with [REDACTED] Friday 3 March at 15:00 works well for us.
Our team will include:

- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]

My colleagues are cc'ed in this email. Would you like me to send the calendar invitation or do you prefer to do it? All fine by me obviously!

We're looking forward to the call!

Kind regards,
[REDACTED]

Dear [REDACTED],

On behalf of [REDACTED] I would like to thank you for your email and meeting request, which has been sent to us, and which he will accept.

Unfortunately, due to other events already in the diary of the colleagues involved, there is no February time slot on offer. However I would like to propose the following time slots for a virtual meeting as requested:

01 March at 14:00
02 March at 16:00
03 March at 15:00
14 March at 15:00

Please let me know if either of the options above is feasible for you.

Thanks

Kind Regards

[REDACTED]

Subject: Honeywell Introduction and Request for Meeting

Dear Ms. Paula Pinho,

As recommended by your colleagues here below, I am contacting you to request a virtual meeting on behalf of [REDACTED].

The purpose would be to introduce ourselves and discuss with you about the contribution we are already making, alongside our customers, to REPower EU as well as to the wider sustainability and decarbonization ambitions agreed within the EU "Green Deal" strategy and "Fit for 55" package. We would also like to discuss how we can scale up heat pump availability for the EU to help the EU meet the current energy crisis, the EU Fit for 55 % targets and address security of energy supply issues with heat pumps for hospitals, schools, commercial buildings and commercial and industrial use also against the background of the F-Gas Regulation.

While our technologies keep cities working, vehicles driving, planes flying, factories running, and workers safe, our offerings are also addressing the important need for greater health and safety (such as for pharmaceutical and medical devices), sustainability practices, and integrity. We apply this lens to everything we do.

We are fully embedded in the European heating, cooling and industrial refrigeration value chain and serving a wide range of industrial sectors and have a unique perspective to offer on the rapid reduction of dependency on Russian fossil fuels. Honeywell technology helps customers lower their greenhouse gas emissions and improve energy efficiency without sacrificing end-product performance, and it is used in various applications, including refrigerants for supermarkets, heat pumps, air conditioning for cars and trucks, blowing agents for insulation, propellants for personal and household care, and solvents for cleaning solutions.

Honeywell Building Technologies is furthermore one of the top three global providers of building management systems, control products and energy management solutions and services. Our solutions enable Europe to address its unprecedented convergence of global energy crisis, climate crisis and economic and social crisis. We drive the climate and energy transitions and we are investing accordingly in our products and technologies within the EU and discuss certain regulatory provisions which are of significance to our heat pump technology in the EU and beyond.

I am hoping you have time to meet in the course of February. I will follow up on your availability in the coming days.

Thank you for your consideration,

[REDACTED]

Thank you [REDACTED]
Hi [REDACTED],
Nice to e-meet you.

The purpose of the meeting would be to introduce Honeywell, particularly the contribution we are already making, alongside our customers, to REPower EU as well as to the wider sustainability and decarbonization ambitions agreed within the EU "Green Deal" strategy and "Fit for 55" package. While our technologies keep cities working, vehicles driving, planes flying, factories running, and workers safe, our offerings are also addressing the important need for greater health and safety (such as for pharmaceutical and medical devices), sustainability practices, and integrity. We apply this lens to everything we do.

We are fully embedded in the European heating, cooling and industrial refrigeration value chain and serving a wide range of industrial sectors and have a unique perspective to offer on the rapid reduction of dependency on Russian fossil fuels. Honeywell technology helps customers lower their greenhouse gas emissions and improve energy efficiency without sacrificing end-product performance, and it is used in various applications, including refrigerants for supermarkets, heat pumps, air conditioning for cars and trucks, blowing agents for insulation, propellants for personal and household care, and solvents for cleaning solutions.

Honeywell Building Technologies is furthermore one of the top three global providers of building management systems, control products and energy management solutions and services. Our solutions enable Europe to address its unprecedented convergence of global energy crisis, climate crisis and economic and social crisis. We drive the climate and energy transitions and we are investing accordingly in our products and technologies in the EU and discuss certain regulatory provisions which are of significance to our heat pump technology in the EU and beyond.

We would like to discuss how we can scale up heat pump availability for the EU to help the EU meet the current energy crisis, the EU Fit for 55 % targets and address security of energy supply issues with heat pumps for hospitals, schools, commercial buildings and commercial and industrial use also against the background of the F-Gas Regulation.

From our side, [REDACTED]
[REDACTED] and [REDACTED]
[REDACTED]
[REDACTED] will attend the meeting.

Please see here below suggested dates and times when both [REDACTED] are available. Should none of the below dates and times be convenient, please send me some suggestions. We will make this meeting our priority.

- Monday 13 February, between noon and 13:00
- Monday 13 February at 16:30
- Thursday 16 February between noon and 13:30 or
- Friday 17 February anytime in the morning.

Should you need any additional information, please do not hesitate to contact me.

Thanks in advance for your kind consideration and kind regards,

for Meeting

Thank you for your email [REDACTED]. I appreciate the complexities of a very busy diary. While [REDACTED] won't be here beyond the two days we proposed, I am based in Brussels and would very much appreciate the opportunity to meet with Mrs Mechthild Wörsdörfer or other members of the DG ENER team. Are there other times available that you may offer in the coming weeks?

Thank you,

[REDACTED]
