**DISTINCTIVELY
ELECTRIC**

GENERAL ELECTRIC Refrigerator

The General Electric Refrigerator was designed and built after fifteen years of pioneering development by the Research Laboratories.

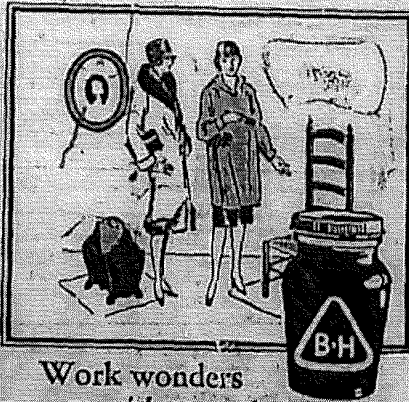

All its mechanism is enclosed in an hermetically sealed steel casing and placed up on top, leaving the cabinet space entirely for food storage. The mechanism thus enclosed is dirt-proof, worry-proof, so automatic you do not even tell it, so quiet you hardly know when the motor is running.

You may purchase any model row with deferred payment.

The "Last Spike" will never be driven

—Southern Pacific still building with the West

The 60th anniversary of the driving of the Golden Spike, May 10, Southern Pacific's Golden Jubilee, finds this western railroad still building. Weaponed with

crude tools, courage and vision, the early pioneer had hand-carried a way to the new West. With the vision of the pioneer, the West has carried on, and with it, step by step, Southern Pacific has

In the last five years Southern Pacific has built more new line than any other railroad in the United States.

In fifteen years Southern Pacific

Across the
Desert—Direct
to Phoenix

has built 1481 miles of new line at a cost of \$8 million dollars. Of this, 40 million dollars has been spent in Northern California and Oregon.

Through the barrier of the mighty Cascades it has created a new north and south railway. It has double-tracked its OVERLAND ROUTE line over the Sierra. A new main line has been built through

Arizona. From Wendell, California, to Lakeview, Oregon, has been broad-gauged.

Now Southern Pacific is completing a short line transcontinental railway through Southern Oregon and Northern California. The Cascade line of the SANTA ROUTE

Then the mighty
Castaway

and the OVERLAND ROUTE
be continued

From less than 700 in 1969 to 16,520 miles made one way of recording the Pacific's 60 years of work.

Behind this cold face of
bank is the epic story of the
opponent of the West. A
