DOCUMENT DESCRIPTION: Letter to Kaiser Gypsum RE Plant Inspection Report

GATES, McDONALD & COMPANY

1330 Broadway, Oakland, California 94612 (415) 832-0301

February 20, 1975

Mr. George W. James, Plant Manager
Kaiser Gypsum Co., Inc.
1302 Ritchey Street
Santa Ana, California

Dear Mr. James:

A safety inspection was performed at your facility on February 10, 1975, and I appreciated your escort and assistance during the tour.

It was a pleasure to note that all of our recommendations of July 10, 1974 have been accomplished.

Of interest is the fact that State inspections have disclosed acceptable asbestos counts. The present plan to discontinue the use of asbestos, however, appears to be a permanent solution to this control problem.

You are to be congratulated on your excellent safety record at the plant which is the direct result of your progressive safety program.

We have no recommendations to submit at this time.

Very truly yours,

B. R. Tolle

Basil R. (Buz) Tolle
Regional Safety Engineer
