Vinyl Chloride Safety
Association Meeting

Dear Member:

The Phoenix meeting was generally felt to have been very productive, with a wide range of topics covered. The fact that the true confessions section was devoid of spectacular incidents is a measure of our success as an industry in promoting safe operation.

John Anderson, our 1985 Vice-Chairman, has tentatively arranged the next meeting for September 12 and 13 at the Innisbrook Inn and Resort, Tarpon Springs, Florida. Members should arrange to arrive by the evening of Wednesday, September 11 via Tampa International Airport.

Our next program chairman will be John Vaughan of I.C.I. Hillhouse, U.K. In order to provide a satisfactory meeting, he needs to know what your wants are and where he can turn to satisfy them. The attached questionnaire addresses these needs. Please complete it as soon as possible, and return it to him at the address on the last page, remembering that we rely on volunteer discussion leaders, seminar presenters, survey takers, etc. for our success.

A list of Permanent Representatives and attendees at Phoenix is attached. A copy of the initiator handling survey is included for those members who provided input to the survey.

I hope to see you all in Tampa.

Yours truly,

J.R. Wallace, Secretary
VC Safety Association

VINYL CHLORIDE SAFETY ASSOCIATION MEETING 1985

TOPICS QUESTIONNAIRE

Please indicate interest as: H (High) M (Medium) L (Low)

<u>1. Case Histories</u>	<u>Topic of Interest</u>	<u>Willing to Present?</u>
1.1 <u>Old Case Histories</u> All Case Histories which are Well Documented with Cause and Corrective Action.	_____	_____
2. <u>True Confessions</u> Any New Incidents within your Company, which are of Particular Interest.	_____	_____
3. <u>Health</u>		
3.1 Angio-Sarcoma Update	_____	_____
3.2 PVC Dust	_____	_____
3.3 Other Health Problems Allegedly Associated with VCM/PVC Dust	_____	_____
4. <u>Monitoring Equipment</u>		
4.1 Area Monitoring Systems	_____	_____
4.2 Personal Monitors	_____	_____
4.2.1 Badge Monitors	_____	_____
4.2.2 Pump Systems	_____	_____
4.3 Leak Detectors	_____	_____
4.3.1 Dust Monitoring	_____	_____
.1 Environmental	_____	_____
.2 Exhaust Stacks	_____	_____

JRW/1066

5. Work Order Systems

5.1 Maintenance Work Orders

5.2 Work Permits

5.3 Vessel Entry Permits

5.4 Lock-Out Systems

5.5 Plant Operating Instructions

6. Legislation-Regulatory

6.1 Regulatory Update

6.2 Update on EPA-OSHA Actions

6.3 PVC Food Application
Regulation Regulations

6.4 Other Legislation Topics

7. Chemical Hazards

7.1 Polyperoxide Formation

7.2 Storage and Handling of
Peroxide Initiators

7.3 Inhibition of Recovered Monomer

7.4 Other Chemical Hazard Topics

8. Plant Design

8.1 Location of Control Rooms

8.2 Design of Control Rooms

8.3 Bunding of Monomer Storage

8.4 Materials of Construction

8.5 Electrical Classification
in Hazardous Areas

8.6 Relief Systems

8.7 Other Plant Design Topics

8.8 Gasket and Sealing Materials

JRW/1066J

SL 088625

9. Safety Programmes

9.1 Safety Committees and
How to Make them Effective

9.2 Dupont Stop Programme

9.3 Incentive/Reward Systems
Their Role in Promoting Safety

9.4 Safety Surveys

9.5 Incident Investigation Techniques

9.6 Other Safety Programme Topics

10. Process Safety

10.1 Controlling Runaway Reactions

10.2 Closed Reactor Hazards

10.3 Inspection Procedures

.1 Process Vessels

.2 Process Piping

.3 Nozzles

10.4 Gasholder Hazards

10.5 Other Process Safety Topics

11. Any Other Safety Topics
of Particular Interest
