

PITTSBURGH
PLATE GLASS COMPANY

GENERAL OFFICES - GRANT BUILDING.

PITTSBURGH, PA.

September 16th, 1938.

INT. RE: ABRAMS

DECEMBER 1938

Mr. E. C. Barnes,
Westinghouse Electric and Manufacturing Co.,
Research Laboratory,
East Pittsburgh, Penna.

Dear Mr. Barnes:

I appreciate very much the courtesy shown me by
Dr. Hazlett and yourself yesterday.

Your set-up for Industrial Hygiene and medical
work is very impressive. You are to be congratu-
lated on the excellent program you have established.

The article that we discussed is entitled "An
Explanation of Silicotic Lesions Based on Tissue
Reaction to Phospholipids", J.T. Fallon, Canadian
Medical Association Jr. 36, 223 (1937). It will be
of considerable interest to watch the literature
for a follow up on this work and your suggestion
that Dr. Mellor of the Air Hygiene Foundation be
notified about it is being followed.

Please let me know when you have returned from your
vacation and have your work well in hand again so
that we may arrange for you and your wife to visit
us.

Very truly yours,

F. R. Holden

F. R. Holden, Ph. D.
Industrial Hygienist.

*Dr. Mellor notified me that they retracted
the article in May 1937. F.R.H.*
