Attn: Trade Information Branch

Dear Sirs:

We are interested in a preliminary survey for all chlorinated biphenyl imports to the U. S. A. for the period 1969 to present.

It is our understanding from contacts with the Bureau in 1969 that these imports are classifiable under other cyclic organic products having a benzenoid structure in item #03.60, TSUS.

Chlorinated biphenyls could appear under several different identities:

1. Isomer name - i.e., mono, bi, tri, etc. through decachlorobiphenyl.
2. Foreign Trade Name

<u>Country</u>	<u>Producer</u>	<u>Trade Name</u>
France	Progil	Pyralene
Germany	Bayer	Clophen
Japan	Kanegafuchi	Kanechlor
Italy	Caffaro	Apirollo
Spain	Flix	--
