Subject: Fwd: today story on regulatory science proposed rule

Good afternoon,

I'm following up on my questions from this morning. See below. I'm looking for clarity on exactly what non-publicly available data includes. My report airs on Cox television stations this afternoon. I can be reached at

[Ex. 6]

Thanks,
Kristin

Subject: today story on regulatory science proposed rule
To: press@epa.gov

Good Morning,

I'm a freelance reporter at the Cox DC Bureau. I'm doing a story today on the new proposed rule posted to the Federal Register today that would require the EPA to use only publicly-available data in setting regulations. I have questions:

How much does the EPA use/rely on publicly-available data v. non publicly-available data?
What are examples of publicly-available data? (i.e. research posted online?)
What are examples of non publicly-available data?

I can be reached at [Ex. 6]

Thanks,
Kristin
