

Attached is an invitation for Administrator Pruitt and his team to visit GE's industry leading additive manufacturing facility in October. We are confident this will be a valuable educational opportunity and something that transforms the way manufacturing is thought about in the future.

This could be scheduled as a day trip to Cincinnati. We propose October 4 but will be flexible around the Administrator's preferences.

Please let me know if I can answer any questions. We look forward to seeing you then. Thank you -- Roger

Also, we will not be doing the press availability after the round table.

>> Hello Millan,

>> As you may know, the Energy & Environmental Research Center is on the campus of the University of North Dakota. Our campus police indicated that two officers and a member of the North Dakota state highway patrol (providing security detail for the governor) will be at our facility on Tuesday morning around 9 am for a site visit. Is this the same visit you are referring to? If so will you be accompanying them or would you prefer the 10 am time? I will gladly accommodate what works the best for you. I'm available all day. Please feel free to call my direct line or my cell if you have any questions.
