subject Kaylo Carton Photos

cc:

*do new photo*  
The mock-up for the 67 and 72 Kaylo cartons are complete. Photographs of all of our Kaylo cartons and warnings have been taken and I have provided copies for you in the attached notebook.

In looking at the 67 photo, I recommend we destroy the picture currently displayed and have a new photo done since this one does not show the warning placement at all. What do you think?

*both french*  
Please note the format of the 66 warning and the 70 warning (PHOTOS) are different. I think we should be consistent. Which do you prefer?

There are copies of the 2 carton pieces we have with the warnings. The original carton pieces are with the other photos in the third drawer of the file cabinet outside of my office.

Is it necessary to provide these same photos to Duane and Brad? — *just have them reviewed Reno*

In addition to the 72 and 83 photos, does Bogan need anything else?

*[Changes to Bogan by the end of the week all of them with further explanation]*
