

Introduction to ClearPath

ClearPath's Mission and Vision

Mission: ClearPath's mission is to accelerate American innovation to reduce global energy emissions.

Vision: America leads the world in addressing climate change by developing innovative, market-competitive clean energy technologies.

► ClearPath Senior Team

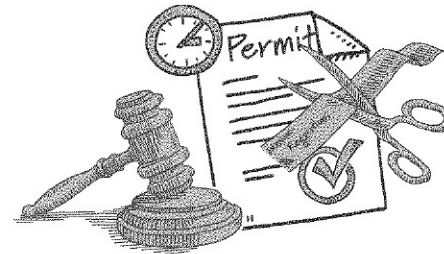

The ClearPath's 40 person team has over 70 combined years of Hill experience and a substantial policy team with expertise from the executive branch, trade associations, NGOs, and industry.

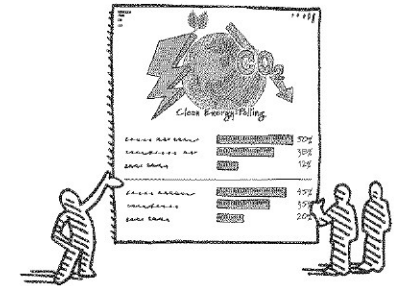

Who We Are

Conservative clean energy advocacy organization. We have traditional think tank policy expertise and experience from both the private sector and the highest levels of government.

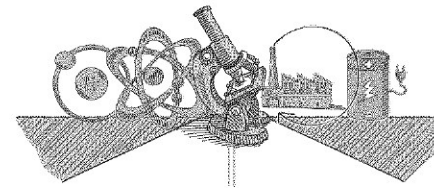

ClearPath's family of entities has four advocacy pillars backed by a strong organizational foundation.

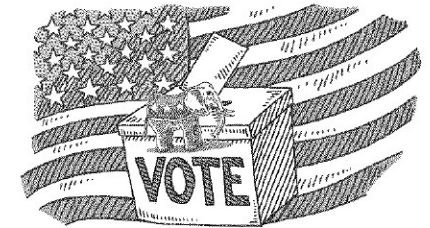

Government Affairs

Strategic Communications

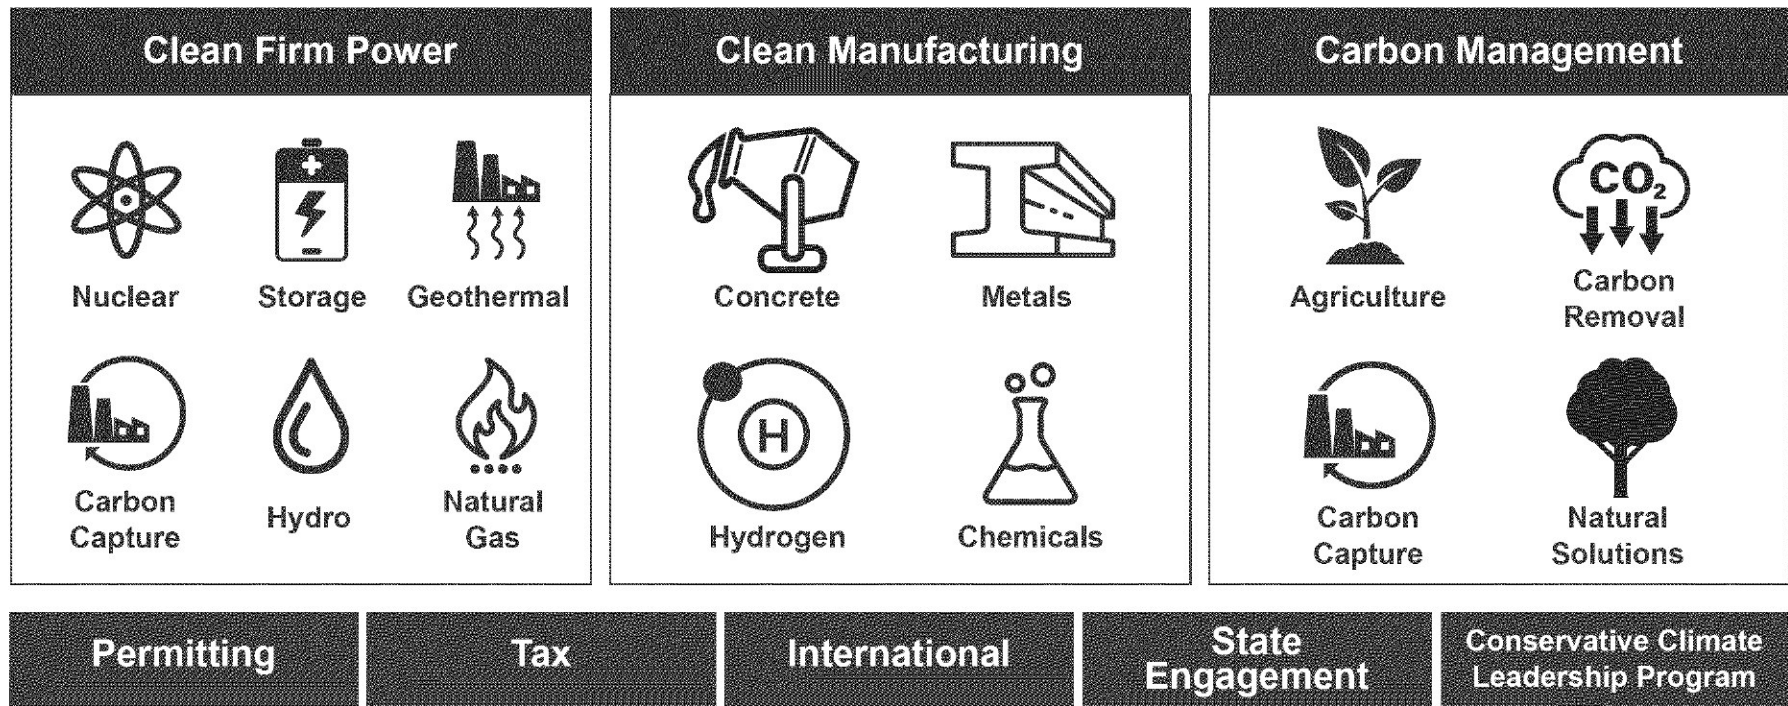

Policy Experts

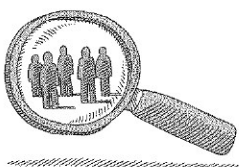

Political Know-How

► What We Do

Innovation

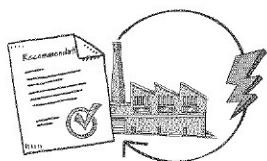

► How We Get It Done

Research

Deep understanding
of technology
and policy
barriers
+
What the public
wants in order
to navigate
the political
landscape.

Craft Policies

Provide expert
technical
support for
writing and
reviewing policies
that connect to the
best clean energy
technologies
America has to offer.

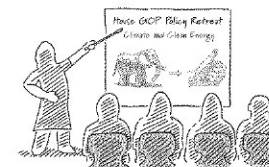

Build Coalitions

Build the right
coalitions with
industry, NGOs and
academia
stakeholders in order
to support solutions.

Define Audience

Know the
influencers in
the public and
private sectors
who will be key
voices to support and
pass
the policies.

Educate & Advocate

Educate
Capitol Hill and
Administration leaders
and policymakers
about the technology
and policy solutions.
Advocate for
pragmatic results.

► Policy Highlights

Carbon Management

- Class VI:
 - Streamline the approval of individual permits and primacy applications
 - Provide regulatory clarity on the eligibility of new carbon storage pathways
 - Leverage the technical support of DOE and its National Laboratories
- Support efficient permitting processes for the build out of carbon pipelines
- Protect and expand the 45Q Carbon Capture tax incentives
- Support DOE efforts to extend existing R&D categorical exclusion to include demonstration activities

► Policy Highlights

Permitting Reform

Durable permit reform solutions will need to balance speed with safety

Ways to expedite permitting include:

- Increasing transparency
- Leveraging regulatory tools like:
 - Categorical Exclusion
 - General Permits
 - Permit by Rule
 - Used by EPA and over 20 states
 - Shifts system from process focus to compliance driven
- Streamlining judicial review
