Mr. J. D. Thomas
PITTSBURGH OFFICE

Dear Jim:

We have just received a quotation from the Carborundum Company for tile shapes A, B, and C. Attached is a copy of the costs of these brick and we believe we should add 25% to the material cost and then add the mold charges. This would work out to be a total of \$983.00 using shapes A, B, and C, and \$953.00 if shapes A and B were combined as in the alternate quotation.

Very truly yours,

J. C. Kliefoth

JCK/bf

P.S. The above prices are based on a quantity of 13 pieces of each tile. This is sufficient for the nose under one 4 burner wall only. We are checking to see if the price would change in the event the quantities are increased to include all four fans.
