

C. L. Curtis / A. E. McHaven - PERSONAL & Confidential

Attached are the results of our Industrial Hygiene Survey ran last June. Also attached is a copy of David Gidley's observations passed on to Mr. Blackwell for his meeting here last Thursday.

Charlie / AI -- we are beyond the point of discussion and only action will speak. Obviously, we can't do everything we would like to do -- exhaust air just isn't available, however, there are things we can do -- must do, within the limits allowed. For example, from the letter of Aug. 26, items 3 & 4 under block peefoms, etc.

If you like, you, AI and myself can discuss in detail, in the meantime, I suggest that you direct Bob and Tally to assign a man on each shift to complete the obvious work to be done.
