January 17, 1973

Mr. Walt Howley
1045 Balmoral Drive
Pittsburgh, Pennsylvania 15237

Dear Walt:

This is to let you know that we have successfully modified our Kilnoise containing asbestos to Kilnoise asbestos free, and we call it Kilnoise - II.

I have had an opportunity to apply this in the field and I can assure you that it works beautifully. It even works better than the old Kilnoise and has the same appearances in light reflection, whiteness and texture. This Kilnoise carries a .50 N. R. C. on solid backing, which is, as you probably know, a difficult rating to get.

As with the former Kilnoise, Kilnoise - II does get hard, which has been a very desirous characteristic by architects for long term maintenance.

Very truly yours,

Harry E. Rourke
