

- Do not log or initiate Workers' Compensation for benign asymptomatic asbestos-related abnormalities until and unless the condition changes to a symptomatic illness.* Do, however, carry out the evaluation of causality, and if Du Pont-related, have it accepted by the Site Manager.
- The asbestos guideline does not mean that workers need be excluded from their craft, but only from tasks that have a potential for exposure to asbestos.

Any questions or concerns that should be addressed in the forthcoming CD&P procedure should be brought to the attention of A. B. Palmer or myself.

F. E. FRENCH

*Exceptions require specific approval of ER Dept. and Environmental and Regulatory Affairs Section.
