

ONE SOURCE—ONE RESPONSIBILITY:

- 1 **SARCO THERMO-DYNAMIC STEAM TRAPS:** The compact, stainless steel traps that virtually eliminate maintenance. Nothing to wear, stick, choke or leak. Same trap for 10-600 psi pressures. *Bulletin 257.*
- 2 **SARCO FLOAT-THERMOSTATIC STEAM TRAPS:** Continuous, shockless discharge of condensate at steam temperature. Automatic gas and air venting through built-in thermostatic by-pass. Responsive to varying loads and pressures. *Bulletins 450 and 455.*
- 3 **SARCO INVERTED BUCKET TRAPS:** Rapid, free discharge of condensate with Sarco camlift mechanism. Designed to prevent prime loss on light loads. *Bulletin 360.*
- 4 **SARCO-OGDEN PUMPS:** Drains liquids by gravity at atmospheric pressures and automatically pumps them to overhead lines or tanks. Simple, economical, and can be used in hazardous locations. *Bulletin 165.*
- 5 **SELF-POWERED TEMPERATURE REGULATORS:** Fully modulating. Sensitive liquid filled thermal system provides uniform valve movement for degree of temperature change. No exposed mechanism. Packless valves. *Bulletin 620.*
- 6 **DIAL-MATIC™ STEAM TEMPERATURE REGULATORS:** Type 25T. Self-powered and pilot-operated. Permits instant dialing of temperature settings and gives rapid response to changing loads. *Bulletin 625.* Also, **DUAL-MATIC™** pressure and temperature regulator — type 25PT. *Bulletin 645.*
- 7 **STEAM PRESSURE REDUCING VALVES:** Type 25P. Accurately reduces steam pressure to demands of process and equipment, from 15-250 inlet psig to 3-200 psig delivered. High capacity, low maintenance. *Bulletin 640.*
- 8 **SELF-POWERED, MODULATING COOLING CONTROLS:** Type T44. This simple, inexpensive automatic thermostatic valve eliminates overcooling and undercooling. Saves water. No exposed mechanism. *Bulletin 710.*
- 9 **SARCO PIPELINE STRAINERS:** For condensate, steam, water, oil, air, gas . . . of bronze, semi-steel or cast steel . . . for all commercial pressures. *Bulletin 1210.*
- 10 **SARCO RADIATOR VALVES:** Complete lines of valves for steam and hot water. Includes reinforced packless, bellows packless, gland packed, and heavy duty brass globe and angle valves. Also convector and radiator gate, and heavy-duty 3-way sweat valves. *Bulletin 225.*
- 11 **SARCO RADIATOR TRAPS:** Type H, for vacuum, vapor, or gravity feed system. Self-adjusting bronze bellows and brass body and cap. Self-aligning head and removable seat of hard bronze or stainless steel. *Bulletin 155.*
- 12 **SARCO FLOW BALANCING FITTINGS:** Unique solid segment

TRAPS... CONTROLS... SPECIALTIES

- 13 **SARCO "BALANCE MASTER" COMBINATION VALVE:** New! With indicating dial. Provides tight shutoff as needed, without disturbing balanced position. *Bulletin 220.*
- 14 **SARCO FINNED TUBE AND BASEBOARD RADIATION:** A complete line with approved ratings as established by Institute of Boiler and Radiator Manufacturers. *Bulletins 1650 and 1660.*
- 15 **SARCO DOMESTIC WATER BLENDERS:** Type DB for use with submerged heating coils or tankless heaters. Type MB for showers, wash basins, etc. Automatically mix hot and cold to desired temperatures. *Bulletin 800.*
- 16 **SARCO SOLENOID-ACTUATED VALVES:** Use for automatic remote control of high and low pressure steam, gas, air, water or brine. Direct, pilot-operated, or diaphragm operated. *Bulletin 1060.*
- 17 **SARCO CONDENSATE, VACUUM, SEWAGE AND CIRCULATING PUMPS:** Complete lines for all capacity ranges. *Bulletins available.*
- 18 **SARCO AIR ELIMINATORS:** For steam and hot water heating systems and chilled water lines. Promotes circulation. Vents air rapidly and completely. *Bulletin 170.*

SARCOTHERM FULLY AUTOMATIC WEATHER-COMPENSATED CONTROL SYSTEMS: For all types of heating. Sarcotherm's approach to your temperature control problems is practical and down-to-earth. Sarcotherm provides the control you need, economically and dependably, but no extraneous components are included and piping and wiring are kept to a minimum. Our engineers will consult with you on any automatic control system problem. *Bulletin ST500-1*, hot water and radiant heating control systems. *Bulletin ST500-2*, steam heating control systems.
