

Aerospot and Dynaflo FANS FOR EVERY INDUSTRY

Aerospot and Dynaflo Fans rate high in efficiency and safety features and offer advanced aerodynamic design and rugged construction. The models shown are in most demand for industrial use. Any unit may be furnished with explosion-proof motor and fan blades. For complete specifications, and listings of other fans available, write for our new catalog today!

HEAVY DUTY AEROSPOT

For general or specific ventilation, manufacturing, or parts-cooling—to increase personnel efficiency and decrease lost time to cooling and drying hot parts. Portable. Direction of blast adjustable. Explosion-proof motor, metal conduit and starter can be supplied. Conforms to state safety regulations.

DYNAFLOW UNITS 2-4 BLADE TYPES

Big Blade model illustrated. For exhausting or blowing against high static pressure. For general ventilation or specific processes where fumes are present. Blade: 18 to 30 in. dia. Capacities: 1500 to 20000 c.f.m. Two and four blade models for applications at lower static pressures.

EXTENSION ARM DYNAFLOW FOR "HOT" OR "EXPLOSIVE" GASES

For exhausting explosive gases or fumes... For circulating "hot" gases up to 300°F. when temperature is too high to permit use of standard or even special motors. Used in heat exchangers—"swelter" ovens, etc. Fans from 18 to 36 in. diameter.

DUCT TYPE UNITS

Direct drive model shown; also supplied with belt drive for high temperatures or corrosive air and gas handling. Designed for blowing in any duct run at any point or at either end. Sizes from 18 to 36 in. fans.

MECHANICAL DRAFT FANS

By GREEN

Green Mechanical Draft Fans Are Custom Built for Both Forced Draft and Induced Draft Service.

Mechanical draft fans for all types of service. Available for single or double width, with single or double inlets. Volume control can be effected by inlet vanes, by inlet control dampers, by variable-speed fluid coupling, or by variable-speed motor drive.

The conditions of air and gases handled, static pressures, types and speeds of drive, space limitations, together with operating characteristics, give too many variables to have a price list on mechanical draft fans. When inquiring give complete data on proposed installation.

THE GREEN FUEL ECONOMIZER CO., INC.

BEACON 2, NEW YORK

Wingfoil "Worldeleading" Axial Flow Fan

The movement of large volumes of air with minimum power consumption by Wingfoil Draft Fans is made possible by the unique Wingfoil Fan Overloading Axial Flow Fan. The remarkable characteristic of the fan is that it imposes less load on the motor as the air resistance increases.

The design of the Wingfoil Straight Line and Elbow Type Draft Fans make them ideal for handling air containing dirt, steam, explosive vapors, etc. The motor is outside of the housing and therefore always cool, clean, easily accessible and out of the path of impurities or corrosive qualities of air being moved.

A complete range of fans in Elbow Type and Straight Line Type. Write for Bulletin F-3.
