Save the Nourishing Liquor
 The liquor covering the peas is rich in food value (it contains the soluble vitamins from the peas) and it should be preserved to use in soups and sauces. Fish peas are clean, since so much water is used to wash them that a pea canner is the wettest place in the world. Peas used just as they come from the can are sweet, full of flavor, sterile and wholesome.

AMMO

Cleanses porcelains, tiles, tubs and basins—really clean—"in a jiffy."

Your Ice Man Sells Refrigerators

An efficient refrigerator saves food, saves flavor, saves money. As experts in household refrigeration, your ice company will help you select one that is efficient. It will either recommend the right refrigerator for you, or sell you one at the lowest possible cost, with convenient terms. Just "ask your ice man."

You can't make

BREAD CHAFF

and the best paint can't be made from

WHITE LEAD SUBSTITUTES

FACTS: Science has discovered no satisfactory substitute for White Lead in paint! No other white pigment has its natural durability and water-resistance.

White Lead paint is the standard paint of the United States Government. It works out more easily, covers a larger area per gallon and leaves a better surface for repainting.

The market price of pure White Lead will not permit its

use, in practical quantities, in cheap paints. FULLER'S PURE PREPARED COSTS MORE PER GALLON BUT LESS IN THE LONG RUN!

Remember these facts when you have your house painted. Now is the best time for painting—while the surface is dry. Call a Master Painter today—and specify Fuller's Pure Prepared, the White Lead paint.
