v Avoid comparable

Pyrawl Toxicity Strategy

1. Introduction
   - Reasons for Pyraul formulations - toxicity stabil
   - more expensive
   - Competitive formulations
     - cresylic - naturally derived
     - isopropyls - low cost
   - Reformulation of 30E, 22ELT, need for strategy
2. Toxicity history
   - Germans, N. Africans
   - how manifests itself
   - precautions necessary
   - EPA involvement
3. Definition of toxicity / test methods
   - Chemistry ? - define structures
   - define neurotoxicity / cholinesterase inhibit
   - by what test methods
   - how contracted ↔ oral / dermatological
4. Current fluids - competitive
   - Chemistry history - tables
   - toxicity results by types
5. Monsanto fluids
   - description - patent position
   - test results
6. Alternatives
7. Potential effects on customers
8. Appendix - Strategy
   - Tables of comparative data
   - Bibliography
