YOUR STUCCO HOUSE NEED PAINT? . . . THEN REMEMBER —

**BOTH
ENDS**

**of the paint brush
are important**

IF you would beautify your stucco
house—weatherproof and mois-
ture-proof it completely—look to
both ends of the paint brush. Put a
master painter on the handle end to
apply the paint as only he can with
his skill and experience. Let his
partner, pure lead paint, be on the
other end to provide a tough, durable
film.

You'll find this combination where-
ever you find a skilled painter with
a long-standing reputation for fine,
honest, conscientious work. The
master painter knows what is best for

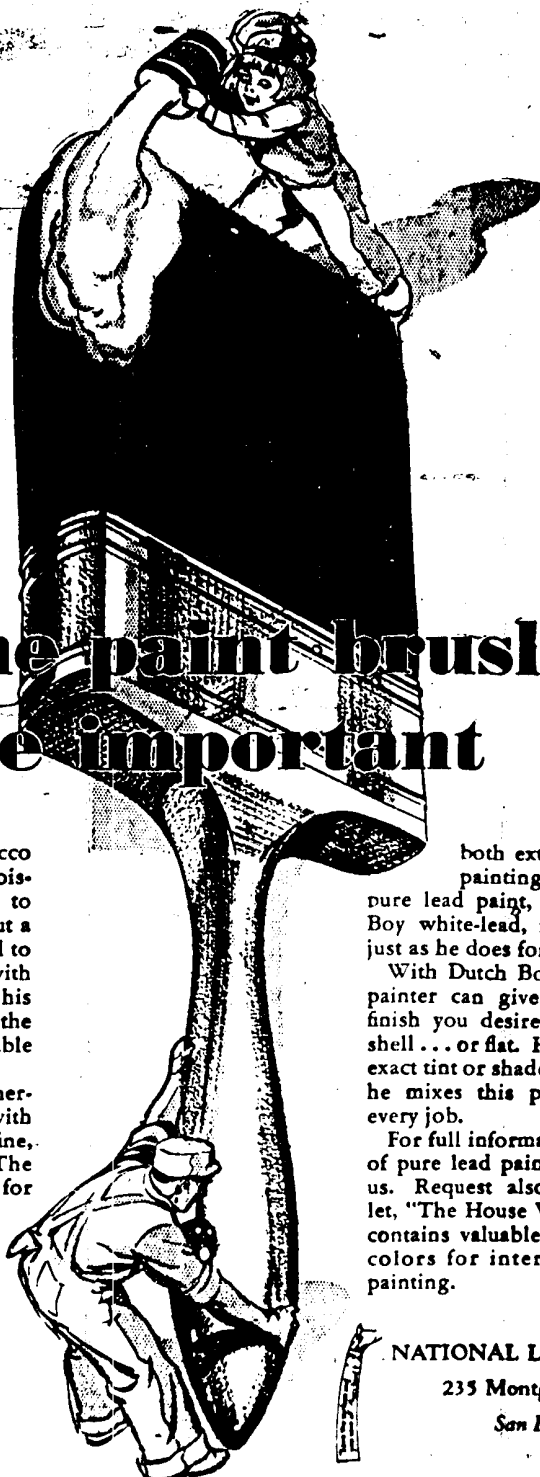

both exterior and interior
painting. And today he uses
pure lead paint, made with Dutch
Boy white-lead, for stucco houses
just as he does for frame houses.

With Dutch Boy white-lead your
painter can give you the exterior
finish you desire—gloss . . . egg-
shell . . . or flat. He can give you the
exact tint or shade you want because
he mixes this paint specially for
every job.

For full information about the use
of pure lead paint on stucco, write
us. Request also our new book-
let, "The House We Live In." This
contains valuable help in selecting
colors for interior and exterior
painting.
