Dr. Robert A. Kehoe
University of Cincinnati
General Hospital
Cincinnati, Ohio

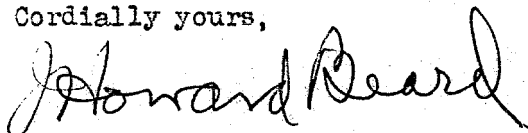

My dear Doctor:

I want to thank you very much for your very informative and frank letter relative to certain experiments on the arsenate of lead that our pomologists here wish to attempt. I am thoroughly in accord with your views in the matter and from the medical standpoint will urge procedure with great precaution if at all and certainly with every available safeguard.

For your information, I might say that other eminent pharmacologists and physiologists have expressed views substantially the same as your own.

Again thanking you for your consideration of my inquiry, I am

Cordially yours,

J. Howard Beard, M. D.
University Health Officer
