

26 April 1946

Dr. McIver Woody
26 Broadway
New York 4, New York

Dear Dr. Woody:

The examination of [REDACTED], tank truck driver for Colonial Beacon Oil Company, revealed no clinical evidence of lead absorption or intoxication.

The hematologic studies and the finding of a slight enlargement of the spleen, suggest that the patient had a previous attack of hemolytic anemia from which there has been almost complete recovery.

As soon as the analytical report on the samples sent to Cincinnati is received, a complete copy of the record will be sent to you.

Sincerely,

WM/rl

Willard Machle, M.D.

New York City

Dear Dr. Machle:

This is to introduce Mr. [REDACTED], who has an appointment with you for examination and report at Company expense at two-fifteen this afternoon.

Any courtesies shown him will be greatly appreciated.

Very truly yours,

EH

McWoody
