Electric roof ventilators	62	Flow, of water	
Electric unit heaters	543	friction of	554
Electrostatic precipitators	214	in pipes	471
Enthalpy	11	Flow meters	528
Equations, conversion	599	Flue gas	
Equivalent evaporation	337	analysis	574
Erection of boilers	343	Flues	
Estimating fuel requirements		chimney	357
approximations	403	dairy barn	68
degree-day method	402	Fluid meters	528
fuel values in heating efficiencies	398	Foodstuffs	48
heating up building structure	400	Forced circulation hot water system	473
hourly heat loss	397	Friction, head	257
industrial degree-day	403	loss of	257
non-heating periods	400	Friction losses in ducts	257
relative heating costs	406	Fuel consumption	397
Estimating heating requirements		Fuel values	360, 398
climatic conditions	108	Fuels	
factors governing heat demand	103	classification	365
floor level	105	gaseous	376
heat from other sources	107	heating value	366
heat loss computations	110	oil	374
high ceilings	106	solid	365
inside temperatures	104	Furnace capacity, gravity warm air	
outside temperatures	103	Furnace design of boilers	334
wind movement	107	Furnace dimensions for stokers	390
Estimating hot water demand	567	Furnace size for mechanical warm air system	312
Eupatheoscope	540, 576	Furnace	
Evaporation, rate of	16, 45	design	334
Evaporative cooling	134	selection of	312
Evaporators or coolers	54, 144	standard code	391
Exhaust head	60	volume	591
Exhaust systems	279	warm air, gas fired	306, 390
Expansion		Fumes	212, 590
bends	456, 494		
joints	455, 491	G	
linear	493, 495	Gages	342, 569
of pipe	491	Garage ventilation	69
thermal	495	Gas, analysis	574
Expansion tanks, hot water	486	boilers	328, 391
Extended surface radiator	414	burners	392
Extra strong pipe	492	furnaces	306, 390
		unit heaters	391
F		water heaters	393
Factors governing heat demand	103	Gaseous fuels	375
Fan and motor characteristics	227, 238	caloric values	376
Fan furnace systems	305, 590	combustion characteristics	375
Fans	225	properties of	376
blast heating	293	relative heating costs	406
booster	330	Gas fired heating systems	394
characteristic curves	227	Gas heating appliances	390
control of	234, 239	control of	198
drives	234	Gas heating, chimneys for	362
drying	233	Gas scrubbers	215
forced draft	349	Glass	
furnace heating	305	heat transmission	119
noise	249	Glossary of heating and ventilating terms	587
power consumption	235	Grate area	324, 591
rating of	252	Gravity circulation, hot water	471
selection of	231, 289, 314	Gravity indirect heating systems	417
stoker	349	Gravity steam heating systems	419, 449
testing code	604	Gravity warm air heating systems	591
ventilating	232	booster fans	330
Filters		furnace capacity	324
air	217	procedure for design	317
automatic	219	proportioning wall stacks	320
dry	219	recirculating ducts and grilles	321
fabric	215, 289	register sizes	321
furnace	308	sizes of leader pipes	319
viscous	219	Green house heating	
Fire tube boilers	332	temperatures of	
Fittings	493	Grilles	321, 591
areas of	504		
flanged	498	H	
screwed	497	Hand-firing	373
welding	501	Hard coal	365
Flanges, pipe	496	Hartford connection	343, 459
Floor furnaces, gas fired	392	Header	460
Flow, of air	57, 255, 273, 281	Heat	
in ducts	261, 286	capacity	591
in pipes	319	measurement of	
measurement of	571	medium	591
Flow, of steam		sensible and latent	591
through orifices	432	sources	41, 107, 115
through pipes	441	Heat and moisture loss from human body	21, 41

	Page		Page
Heat content	10	absolute	2
Heat emission of radiators and convectors	407	definition	2, 592
