HERE IS A DEVICE that really cuts down your charcoal consumption. It is a tray with a special lid that will fit in any 24-inch circular brazier. When you are through barbecuing, you simply cover the coals with the lid and the fire is snuffed out immediately. Ashes and unburned charcoal are confined in the Char-Saver. When cool, you can shake the ashes out of the pan through the draft holes in the bottom and the unburned charcoal is ready for another barbecue. The pan has a small reservoir in the center for a liquid fire-starter to make it easier to start your barbecue fire. The special pan and lid combination sells for \$7.95.

Quick clean-up. Simply wash out your roller or brush in detergent and water. No smelly cleaners needed.
