Mr. James Kinney
GENERAL ELECTRIC COMPANY
Redmond Circle
Rome, Georgia

Dear Jim:

Enclosed is copy of the analysis and proposed specification for the 87.5% Aroclor 1242 and 12.5% Aroclor 1260 blend.

Have arranged to send to your attention 5 gallons of the Biodegradeable dodecyl benzene. There will not be a charge for this.

Appreciated learning that your prototype transformer with the new fluid will have finished its run tomorrow. We will let you and Mike decide whether you want George and myself to come to Rome or whether you folks will wish to be our guests here in St. Louis.

Very truly yours,

P. G. Benignus
