Wilmington, Delaware 19898

Dear Ms. McLaughlin:

As you will have learned your revised manuscript, "Longitudinal Studies of Lead Levels in a United States Population," has come in. We have now had an opportunity to review it in the light of the comments of the reviewers and can assure you that it is now accepted for publication.

I have some hesitation in indicating in which issue it may appear, but I should rather expect it to be ready for the October or November issue.

Sincerely yours,

John S. Chapman
