Dr. R. A. Kehoe
Kettering Laboratory of Applied Physiology
Cincinnati, Ohio

Dear Dr. Kehoe:

In reply to your letter of May 16, I think it would be a very good idea for us to prepare the apple powder for your experiment, since we have all the apparatus necessary and are already experienced in making it. Before I can assure you definitely that we will make it, provided of course that you still want us to do so when the time comes, it will be necessary for me to secure the formal approval of the Head of the Department and Dean of the College. I have been trying to secure an interview for this purpose and will let you know definitely after I have seen him. I think that he will be very glad to have us go ahead with this because he is very much interested in this experiment.

With best personal wishes, I am

Yours very truly

W. A. Roth

Chief in Pomological
Physiology
