

XF: OSHA - Benzene

## Interoffice Communication

To Susan Mileti

From Tom Grumbles

Date August 16, 1983

Subject RESPONSE TO OSHA REQUEST FOR BENZENE INFORMATION

Enclosed is a copy of Chemicals' comments which will be part of Conoco Inc's response to OSHA. The decision has been made not to answer all questions but comment only on specific items, the majority of which are in Chemicals' comments. Please let me know if you have questions on any of these comments.

In reviewing your draft comments, I have only one general comment. The answer to Question 6 is unclear to me as to when negative pressure respirators are used. I would be interested in how you arrived at \$75-100 per sample figure for benzene analysis.
