RE: Joseph J. Barclay
Our File No. 76-324

Gentlemen:

The purpose of this letter is to advise you that this office represents Joseph J. Barclay for damages incurred at his farm near Fountain City, Indiana, which damages occurred as the result of PCB (polychlorinated biphenol) contamination of silage on his farm. As a result of the above mentioned contamination, Mr. Barclay will be forced to destroy silage, a silo, and, has sustained substantial loss to his milk production as well as the loss of a portion of his dairy herd.

The source of the contamination in Mr. Barclay's silo has been determined to be a product manufactured and sold by Monsanto under the trade name of Cumar.

At this time we would request that a representative of Monsanto or its insurance carrier contact this office within the next ten (10) days to discuss the possibility of resolving Mr. Barclay's loss without the necessity of litigation.

In the event that you have any questions or if I may provide additional information for you, please feel free to contact me at your convenience.

Yours very truly,

WILSON, TABOR & HOLLAND
