

KONICIDE CLUB.

The following tentative program is suggested for the coming meeting at Montreal, Wisconsin, July 12 and 13, 1957.

Monday, July 12.

9 A.M. Inspection of Examining Rooms.

10 A.M. Presentation by Dr. L. U. Gardner, consisting of Microscopic Slides Demonstrating the Difference in the Silicotic Nodule of This Industry as Compared to Those of Other Industries.
Discussion.

11 A.M. Presentation of X-Rays Typical of This Industry by Dr. Homer L. Sampson.
Discussion.

2 P.M. Inspection of Surface Equipment.

Inspection of Dust Counting Equipment, Maps, Etc. These to be presented by Mr. Carl Fellman of the Montreal Mining Company.

7 P.M. Dinner as Guests of the Montreal Mining Company, (Place to be announced later).

Tuesday, July 13.

7 A.M. Trip Underground at the Montreal Mine.

2 P.M. General Discussion of Medical and Engineering Problems.

Several things are to be definitely understood. The whole affair, as you suggested, is to be as informal as possible. The medical men may not care to attend engineering discussions. The Engineers may not care to attend the medical discussions. Effort will be made to furnish cars to take either group to points of interest in this section, or, if any of the group prefers to sit

MEETING OF THE KOMICIDE CLUB
Department of Industrial Hygiene
Metropolitan Life Ins. Company
1 Madison Ave., New York

MONDAY, NOVEMBER 23, 1936.

- 9:30 A.M. Demonstration and discussion regarding the progress of the pneumoconioses (Sampson, Pendergrass, Sayers and Lanza).
- 10:30 A.M. Medical control of a large industrial plant by (medical director - Gardner to arrange, if possible).
- 12:30 P.M. Luncheon at Metropolitan Life Insurance Company.
- 2:00 P.M. Petrographic analyses of silica and other minerals (Gabriel).
- 3:00 P.M. Experimental results of exposures to various substances (Gardner).
- 4:00 P.M. (Clark).
- 4:30 P.M. Dust control in a granite project (Drinker).

TUESDAY, NOVEMBER 24, 1936.

- 9:30 A.M. A state program of industrial hygiene (Greenburg).
- 10:30 A.M. Discussion of the silica content of dusts of various sizes (Hatch, Fehnel and a representative of Trudeau).
- 11:30 A.M. Discussion of the design of control equipment in an asbestos plant (Fehnel).

Please advise Dr. W. J. McConnell, Metropolitan Life Insurance Company, New York, New York, whether or not you are coming.

PROGRAM

MEETING OF THE KONICIDE CLUB IN PHILADELPHIA

Hospital of the University of Pennsylvania, X-ray Laboratory,
November 11 and 12, 1933.

Saturday, Nov. 11, 1933.

A.M.

9.00 to 9.05 Call to Order.

9.05 Dr. H.R.M. LANDIS - Clinical Concept in some Cases of Pneumoconio

9.20 Dr. Simon S. LEOPOLD - The Clinical Examination in Silicosis.

> 9.40 Dr. Leon COLLINS - Pneumonia in the Silicotic.

10.00 Dr. J. R. DYSON - Cardiac Lesions in Silicosis.

10.15 Dr. J. Robert ANDREWS - The Incidence of Cardiac Lesions in our
Cases of Silicosis.

10.30 Dr. Wendell C. HALL - Symptoms Occurring in a Group of Pure
Pneumoconiosis of Various Extent.

10.40 Dr. Leslie OSMOND - Symptoms Occurring in Cases of Pneumoconiosis
plus Tuberculosis.

10.50 Dr. Philip J. HODES - Symptoms Occurring in a Group of Studied
Pneumoconiotics, and the Nature of the Condit
that Occasioned their Hospitalization.

11.00 Dr. F. K. ALEXANDER - Duration of Exposure to Dust as related to
the Roentgen Findings.

11.10 Dr. Gabriel TUCKER - Bronchoscopic Findings in Silicosis.

11.25 Dr. John H. HARRIS - Report of Cases of Carcinoma of the Larynx
in Silicosis.

11.35 Dr. M. Lowry ALLEN - Report of Cases of Carcinoma of the Lung in
Silicosis.

11.45 Mr. Charles WEYL - Discussions of Roentgenographic Technic of t
Chest and its Essentials.

DISCUSSION.

P.M.

12.30 LUNCHEON.

2.00 FOOTBALL GAME.

6.30 SUBSCRIPTION DINNER University Club, 16th and Locust Streets, Phil

Program - Konicide Club Meeting (continued)

Sunday, Nov. 12, 1933.

A.M.

9.30 Dr. E.P. PENDERGRASS - Radiologic Technic.

9.45 Dr. H. K. PANCOAST - The Healthy Adult Chest as Determined by the Roentgen Examination.

10.00 Dr. H. K. PANCOAST - Roentgen Classification of Pneumoconosis:
DISCUSSION.

10.30 Dr. F.M. McPHERDAN - Is One Justified in Making a Roentgen Diagnosis of Tuberculosis without Clinic Evidence in the Pneumoconiotic?

11.00 Dr. E.P. PENDERGRASS - Differential Roentgen Diagnosis between Silicosis and Silico-Tuberculosis.

DISCUSSION - Dr. H. K. Pancoast
Mr. H. L. Sampson

11.45 Dr. Karl KORNBLUM - Differential Diagnosis of Pneumoconiosis in Various Industries.

12.00 Dr. J. H. HARRIS - Massive Fibrosis in Pneumoconiosis simulating Mediastinal Tumor.

12.15 LUNCHEON.

P.M.

2.00 Dr. H. K. PANCOAST - Differential Roentgen Diagnosis of Lesion simulating Silicosis.

DISCUSSION.

2.30 Dr. H. K. PANCOAST - Significance of Nodules in the Silicotic Lung.

DISCUSSION - Dr. LeRoy U. Gardner

3.15 Dr. H. K. PANCOAST - The significance of Massive Fibrosis in the Silicotic Lung, its Position, etc.

DISCUSSION - Dr. LeRoy U. Gardner

4.00 Dr. LeRoy U. GARDNER - What is known regarding Asbestosis.

TOXICOLOGY CONFERENCE

January 3 and 4 (Friday and Saturday)

Harvard School of Public Health

It has been suggested that we have a meeting here with discussions by (1) Brown on particle size with Bloomfield and others to take part. (2) Hatch and Cummings to present light vs. dark field counting and discussions by Cook and Bloomfield or Dallavalle. (3) Hatch and Lake to give their data on the results of their many analyses of mixed dusts and their significance in the etiology of silicosis. (4) Professor E.E. Larsen to talk informally on petrography and silicosis. (5) C.E. Drinker to talk on lymph circulation and silicosis. (6) Philip Drinker to give new data on nasal dust filtration.

An informal dinner can be held Friday night at a near-by place where Laura and Drinker will later have a chance to exhibit their processes at Kelly pool. Drinker will be glad to arrange for rooms for those so desiring, probably at the Harvard Club or the Faculty Club.

Philip Drinker

Secretary

P.S. PLEASE REPLY AT YOUR EARLIEST CONVENIENCE

Dec. 28, 1934.

KONICIDE CLUB MEETING

The KONICIDE CLUB will meet Sunday and Monday, January 13-14 in Washington, D.C., care of Dr. R.R.Sayers, Office of Industrial Hygiene, U.S.Public Health Service.

This promises to be an unusually important meeting and like our previous meetings, will be entirely informal and strictly private. It was impossible to fix the dates until today.

The program is in the hands of Sayers et al. and has a direct bearing on the forthcoming conference at the Mellon Institute. Among topics to be discussed are: (1) adoption of roentgenological changes, etc. as set forth in the Nov. 18, 1934 meeting at Philadelphia by Sayers, Pancoast, Pendergrass, et al.; (2) recommended procedure in dust control; (3) recommended procedure in medical control; (4) presentation by Miller and Sayers of their data on the intraperitoneal injection of dusts.

This list is quite unofficial and will be changed by Sayers as he sees fit. Please write him at once giving your own suggestions and arranging direct with him for your hotel reservations. There will be an informal but cheery Dutch treat dinner on either Sunday or Monday evening.

Philip Drinker.
Secretary
