ACCOPAC
NEW PRODUCT
ASBESTOS PAPER - AD-8024

We are pleased to announce another new product in our popular line of Accopac materials — Asbestos Paper.

Product

AD-8024 is an asbestos paper made by the beater saturation process. Recent equipment additions to our paper machine and new developments in latexes, permit higher production speeds and better quality control. These improvements have made it possible for us to offer a higher quality product at competitive levels.

Availability

AD-8024 is now available in the following gauges and roll sizes:

1/32" Gauge

50 yd. roll - 60 lbs.
250 yd. roll - 300 lbs.
900 yd. roll - 1,080 lbs.

1/16" Gauge

25 yd. roll - 50 lbs.
150 yd. roll - 150 lbs.
450 yd. roll - 880 lbs.

All rolls will be 36" wide. The product is white in color and will not be trademarked.

Product Advantages

1. The improved manufacturing process and selection of resin give AD-8024 uniformity in color, weight, gauge, density, that are superior to other asbestos papers and millboard stocks. The handleability, and flexibility of AD-8024 should help to reduce part breakage during fabricating, shipping, and in-plant installation. This should help reduce costs.

The large rolls also provide better material utilization for the fabricator.
