

Make Baby's Bed Look New Again

Baby's bed is scratched and marred in many places and you would like to see it look new again.

With a little effort and the right enamel, you can make it look as bright as the day you bought it.

Just call at our store and buy a can of

Bass-Hueter White Enamel Finish

We will tell you the brush to use and how to apply the enamel. You will enjoy the work because it is so easy and the result so satisfactory. Paint the bed in the morning—the enamel dries quickly—baby can sleep in the bed that evening.

There are many other uses of this enamel to brighten the home.

Use it in the bathroom on the walls, wainscoting and tub. It forms a hard, durable, lustrous enamel surface—resists moisture and holds its pure white finish. Go over the surfaces occasionally with a wet cloth and the room is spotless.

The reason we recommend Bass-Hueter White Enamel Finish is because we know it stands the test of time and wear—works easily under the brush—covers the surface with a small amount—and is withal the most economical and satisfactory enamel you can buy.
