Mr. Fred Mulhorn
Foseco Minsep, Inc.
Mt. Braddock, Pennsylvania 15465

Dear Fred:

As a preliminary report we wanted to advise you that the "1030 Special" Hot Tops sent in with our last shipment seem to be working out more satisfactorily and more consistently than the regular material we complained about. However, this new material is not as good as the old hot top material which contained the asbestos.

We will follow closely the balance of the Special Hot Tops and report how we make out.

Very truly yours,

DRIVER-HARRIS COMPANY
